Subject: Pre-incident maximum sediment concentrations from the Animas River between Durango and Silverton, Colorado

I have attached the pre-incident maximum sediment concentrations from the Animas River between Durango and Silverton, Colorado that EPA Region 6 mentioned on our conference call today (Friday, August 14, 2015).

The EPA Region 6 Environmental Unit (EU) deduced the pre-incident maximum sediment metal concentrations from the Animas River between Durango and Silverton, Colorado from this information provided by the EPA Region 8 EU.
